

Financial Health Dashboard – Task 1

Report

Project Overview

The Financial Health Dashboard is an interactive Power BI dashboard developed to analyze business financial performance. The dashboard provides insights into revenue, expenses, profit trends, category-wise performance, and regional analysis.

This dashboard helps organizations monitor financial growth and make better business decisions using data visualization.

Dataset Information

Dataset Name: Financial Health Dataset

The dataset contains financial information including:

- Transaction ID
- Date
- Category
- Region
- Revenue
- Expenses
- Profit
- Payment Mode

Tools Used

- Power BI Desktop

- Excel Dataset
- Data Cleaning and Transformation
- Data Visualization
- Data Analysis

Dashboard Overview

Sum Of Profit By Year, Quarter, Month, And Day Analysis

Sum Of Expenses By Category Analysis

Sum of Expenses by Category

Sum Of The Revenue By Region Analysis

Sum of Revenue by Region

Key Performance Indicators (KPIs)

- Total Revenue Analysis
- Total Profit Analysis
- Expense Tracking
- Category-wise Financial Analysis

Financial Analysis

Revenue and Profit Analysis

The dashboard analyzes the relationship between revenue generation, expenses, and profit.

Expense Distribution Analysis

Different expense categories are analyzed to identify major spending areas.

Regional Performance Analysis

The dashboard compares financial performance across different regions.

Key Insights

1. The organization can monitor total revenue and profit performance.
2. Expense patterns help identify areas where cost optimization is required.
3. Profit trends help in financial planning.
4. Regional analysis identifies high-performing areas.
5. The dashboard supports data-driven financial decisions.

Conclusion

The Financial Health Dashboard provides valuable insights into revenue, expenses, and profit trends. It helps organizations understand their financial position and supports better budgeting, forecasting, and business decision-making through interactive Power BI visualizations.
